SUMMARY

I am a results-driven Web and Frontend Developer with 2 years of hands-on experience in building responsive, high-performance, and user-friendly websites. My expertise includes HTML, CSS, Bootstrap, JavaScript, jQuery, React, PHP, MySQL, and WordPress (Custom Theme Development & WooCommerce). I have developed business websites, e-commerce platforms, and author websites, along with creating customized Mailchimp email templates for marketing campaigns. I focus on writing clean, scalable code and delivering solutions that combine strong functionality with modern design. In addition to web development and frontend development, I built my Final Year Project, "Maju Trackmate," a campus management mobile application developed using Flutter, Dart, and Firebase, demonstrating my ability to create real-world, user-centric digital solutions. I am passionate about continuous learning, performance optimization, and turning ideas into impactful digital experiences.

TOP SKILLS

- WordPress Development
- PHP Development
- Frontend Development (HTML, CSS, Bootstrap)
- MySQL Database Management
- Mailchimp Email Template Design

EXPERIENCE
